THE ANSWER FOR
COMFORT AND VERSATILITY

WE'VE GOT YOUR BACK

It's no stretch to say that we're all unique. Different sizes. Varying postures. Individual work style preferences. So how do you address all this and more with a single chair? You simply solve the problem. With three back materials, three ergonomic controls and an optional adjustable lumbar support, Solve answers the need for total customization. This flexible seating family allows everyone to get what they want from their chair. Optimal balance. Proper alignment. Total support. It helps everyone do more with less, making it the one chair to fit every space.

ReActiv™ Back With Upholstery
Combine the ergonomic benefits of the ReActiv back with the look and feel of an upholstered back.

ReActiv Back
The patented geometric back design provides a firmer fit, while providing continuous airflow to keep the body cool.

SUPPORT EVERY SPACE

Today's workers are finding new ways to stay productive and different spaces in which to work. It's time to find a chair that can help you keep up with these evolving work styles and environments. Solve easily transitions from individual to collaborative work at a moment's notice, just like you do. Designed to adapt to any body type, it responds to your natural movements to provide continuous comfort, making it feel right at home in any space. With this level of comfort and support, consider your search for the next evolution of task seating solved.

TOTALLY COOL. COMPLETELY YOU.

If you want to make a powerful statement, simply have a seat. Solve's geometric ReActiv back creates a contemporary look, while the ilira-stretch mesh back is a great choice for a softer, more relaxed feel. Add upholstery in a variety of colors to match your selection to your workplace vision. Optional arms and lumbar support put the power of customization in your hands. With Solve, taking your seat means taking a stand for greater comfort and productivity.

CONTROL OPTIONS

Solve offers three synchro-tilt control options, ranging from the basic to the most advanced synchro-tilt mechanism that supports a wider range of postures.
